

trying to get a spacific bass sound

Posted by theorize - 2009/08/21 18:25

it's in the first demo song right after the first pitch rising sound. obviously I know the synth, I don't own a 101 but i'm using the TAL one as a stand-in. I'm having trouble getting the right distortion and overall tone. I'm guessing there's an EQ after the distortion to cut out those mids. I love the softish fuzz on it and how the highs stand out. I haven't really been into these kind of sounds in the past so I never bothered to learn them but I'd like to nail this one at least and any help would be much appreciated.
