Biggupz man! Love the sounds for real. We'd love to see you around Nubreaks more often big fans of your work! Remember whenever you have a release you want to promote put it in the Forum just like you did with links to the sample track any review info you may have or description and also a picture or graphic. If you have the graphic in there it makes it easier for use to post to the front page for featured releases :-)) I went ahead and snagged the pic myself this time. Much respect!!!!
