Drkwtr's production style is not regimented to any one genre in particular, however he tends towards fusing elements of Jazz and Funk in all his songs, often either upbeat and dark, or smooth and uplifting.

He puts emphasis on intense melodic composition, catchy chord progressions, and a minimalistic approach towards effects - leaving the sounds he has chosen to really speak for themselves.

He has a recent signing with "We Are Live Records" (UK), and "Breakzrboss Records" (CAN), along with a few independent releases, and albums.

He is currently working on a collaboration with a few other artists on an album titled "A DJ's Guide To The Zodiac": a collection of 13 tracks of various genres and styles to represent the signs of the Zodiac and their personalities through the use of sound.
