The reception was sensational really. But he would see the clippings. The first printing had been five thousand copies and on the strength of the reviews a second printing had been ordered. The upcoming advertisements would carry the phrase Now in Its Second Printing. His publisher hoped that he was as happy as he deserved to be and taking the rest that he so richly deserved. He sent his best greetings to his wife. The young man borrowed a pencil from the waiter and commenced to multiply h'50 by one thousand. That was easy. Ten percent of that was two hundred and fifty dollars. Five times that was twelve hundred and fifty dollars. Deduct seven hundred and fifty dollars for the advance. That left five hundred dollars earned by the first printing: Now there was the second printing. Say that was two thousand. That was twelve and a half percent of five thousand dollars. If that was how the contract was. That would be six hundred and twenty-five dollars. But maybe it did not go up to twelve and a half percent until ten thousand, Well it was still five hundred dollars. That would still leave a thousand.
