FUJ - Opia/Pelagic

From the mind of Fuj comes two brilliant works of modern drum and bass music that are a perfect examples of why his art has received countless praises.

Simply put, this release is an artist hitting their stride with ease and focus.

Opia - opens with sparse and crisp percussion and pads that slowly build up momentum as the bass line drops and dances perfectly with pulsing synth stabs.

These give way to more airy pads and layered sonic textures and break beats that are as good as it gets.

Prelagic - is an exploration in minimal, yet complex break beats with flanged synths and chopped processed vocal snippets weaving in and out of frame.

It beckons you to get lost in its hypnotic call and leaves you satisfied that did.
