---

Canadian breaks producer Propa Dropa joins Toast & Jam with his new track Save The Rave. Out of the first drop we are introduced to the syncopated bass line that sits under some very nice kick, snare, and percussion elements. From here Propa Dropa transitions the bass from short and syncopated to gritty and sustained, and along with the 'Oh my God!' vocal loop, the effect is nothing short of bone-rattling. Save The Rave is an all-out party jam!
