FM-3 drops his latest funk-bomb Microphone Check on Toast & Jam. In the first breakdown we are introduced to a classic-sounding rave synth stab that is eventually pitched down and leads us to the first drop. At the drop, the sub bass is layered in along with a punchy garage-style drum kit. A little further down the line, a vintage hip-hop vocal sample is employed along with some classic synth effects and the result is a red-hot breakbeat jam.
