

GavTech - Underground Hoodlum ***OUT NOW!!!***

Posted by toastandjamrecordings - 2022/09/25 03:06

We've scooped up another outstanding producer and are delighted to welcome GavTech to the Toast & Jam fold. We've got a few releases coming your way from GavTech and we're kicking things off with Underground Hoodlum, a mid tempo breakbeat roller with a sawtooth bassline set to do some serious subwoofer damage. Along the way you'll encounter chord stabs, well-timed vocal programming, and bubbling synths that set the stage for this high energy, head-bobbing jam.
