We've got another top tier remix package for you from another one of Toast & Jam's hottest tracks, Alt-A's Level The Funk. BasStyler kicks off the project by reworking the original synth riff into a slightly different melody. He then incorporates the original vocal sample as we are introduced to a brand new tear-out sawtooth filter-sweeping bass line. The GavTech remix takes us on a tech-breaks journey as the original melody and vocals are cut, chopped, and rearranged. The bass line is a low wobbling sub-rattler, while heaps of editing showcase GavTech's unique production style and skills.
