

Kid Digital - Front To The Back *NOW ON BANDCAMP!*

Posted by toastandjamrecordings - 2022/11/17 04:19

Kid Digital drops another stellar production with his new track Front To The Back. During the intro we are introduced to the piano chord progression and main vocal as he builds the elements for the first drop. These layers are then peeled away as the bassline kicks in and is featured stand-alone during the first section. After grooving the bassline by itself, the piano chords return with a progressing bassline to match while the vocal loop chants alongside in harmony. Super-funky breakbeat vibes from Kid Digital right here!
