Posted by toastandjamrecordings - 2023/02/17 03:31

Pointless Animals has been making waves in the breaks scene lately and Stop Signs is his latest haunting 808 bass creation. Featuring a chillingly beautiful female vocal loop, Stop Signs is an evocative exploration of feelings with its shape shifting pads and arpeggiated high-end synth work. Pointless Animals once again flashes his drum programming dominance with a driving effort set to dominate your local dancefloor.
