

Hexadecimal & US Beat Squad - Yes Selecta OUT NOW!

Posted by toastandjamrecordings - 2023/05/23 04:31

Yes Selecta! Hexadecimal & United States Beat Squad have teamed up to bring us this bouncy slice of breaks and the result is an uplifting reggae-infused funk bomb. The main drop begins with a synth bass that sits right on the beat as the vocal sample chants its way through. In the second half of the drop, the synth bass changes to a sweeping effect as an arpeggiated synth joins the mix. With its chunky drum kit and ultra-clean production, Yes Selecta is a real testament to the skills of these two excellent producers.
