---

Known for his cinematic production style and use of live instrumentation, Corey Croft joins the Toast & Jam fam with his new track Mogwai. Warm feel-good vibes are the order of the day here as Mogwai makes use of an array of dancing synths and a processed stutter vocal that finds its place in the background acting almost as a complimentary synth element. A crisp snare cuts its way through the mix along with the kick drums and bass line to give Mogwai just the right amount of dance floor punch.
