

Incredible Melting Man/Seth Vogt - Skies OUT NOW!!

Posted by toastandjamrecordings - 2024/01/18 19:09

Two of our favorite producers have just knocked out a collaboration entitled Skies and suffice it to say, this one is a panoramic breakbeat masterpiece. The vibes are warm and uplifting as the melodic synth dances in a call and response with the bass synth line. There's a nice syncopated rhythmic element to keep things just a tad groovy as Melty and Seth lay down some champion drums. Can't get enough of this one.
