

Four Motion & TRS - Mandalorian **OUT NOW!!**

Posted by toastandjamrecordings - 2024/01/18 19:30

Four Motion & TRS have been knocking out some serious heavyweight breaks as of late and the duo is back in action once again with their new jam Mandalorian. About as face-melting as you can get, Mandalorian lifts off with massive drums and a stereo widened bass line that alternates in rhythmic harmony with a filter-swept 16th note synth. A chanting female vocal loop is going to be the only element to soothe your soul as Mandalorian takes you on a warp speed ride across the breakbeat galaxy.
