

Pointless Animals - Hi-Fi *OUT NOW ON BANDCAMP!!*

Posted by toastandjamrecordings - 2024/01/18 19:39

Pointless Animals is back with another thought provoking and evocative slice of breaks on Toast & Jam. Hi-Fi centers around a Kraftwerk-esque vocal chant along with the usual array of sweeping pads and synths to create an ultra-vibey soundscape that is just a pleasure to shuffle your feet to. As we have come to expect, the mix is very tidy and the drums are of the signature Pointless Animals variety. We can't wait to bust out Hi-Fi at maximum level!
