Yo Yo, I just wanted to drop a link to you all so you could check out my soundcloud page that has some of my most favorite and well revived mixes over the past 11 years. So please feel free and check out it, download them and let me know what you think. And oh yeah, please feel free to follow me also on Sound cloud so that way you will be updated every time I drop a new mix there for you all to enjoy. Here's the link for all the ROCKIT goodness you can handle.

And I will also be throwing up all my new mixes here too for all you who frequent the NUBREAKS forum broad to find out what's going on with all of here on the station.

So thank you for checking my mixes out and hope you enjoy!~
