Within this podcast I find myself creating a mix of pure Cut & Run Records. This label played a big part in my love of the Breakbeat, most of the tracks I've chosen I played out in clubs at the time and pushed this label quite hard and used to stock the vinyl in my shop for quite a few years.

I've decided to upload this podcast without any speech / audio from myself. It's a much more relaxed mix allowing the track to play unlike my older Breakbeat mixes online. For me at that time I mixed out of a track within a few minutes and a chilled mix never crossed my mind.
