

Trilo • Universal [new mix]

Posted by trilobyte - 2007/06/08 23:57

Here's my latest. I've been on a bit of an electro breaks kick lately (well, the last few years hehehe) and this is the inevitable musical meltdown, with a few other sub-genres thrown in for good measure. It's in standard MP3 format, I'll have an enhanced version with additional art and embedded artist/track info for fancier MP3 software, ipods, and iphones in the next few days.
