AutomAte is in the podcast business and is now in the iTunes store ;-)

Search for 'AutomAte dnb' in the iTunes store or hit automatednb.podomatic.com. Feed address is <http://automatednb.podomatic.com/rss2.xml>, if u need it.

All podcasts will be free. We aim to do 1 per month or so, from a variety of artists, encompassing drum & bass, dubstep & breakbeat. Might even do a DMC scratch special and a dub/reggae special.

Episode 5 (psy-breaks by Peak) is out now!! Peak has been writing hard dance music under the name Ephexis for over 10 years & also produces psy under the name Atomic Species. He & partner-in-crime RMS fused their styles and gave birth to a hard-tripping melt of chunky breakbeats, acidic twisted elements and dark psychedelic undertones. After a number of successful gigs, 'RMS & Peak' established themselves as a popular breakbeat act. They now go from strength to strength, playing festivals and performing full multi-media live shows as well as releasing through Broken Robot Recordings.

Also available:

Episode 1 - dnb from Deficit

Episode 2 - dubstep by Tracksuit Mafia

Episode 3 - tech dnb from Esion

Episode 4 - tech dnb & dubstep by GRINteck

Enjoy ;-)
