Posted by WeFearSilence - 2009/09/01 10:04

We Fear Silence & Tectonic // Corsica Studios // Friday October 2nd // 2200 - 0500

We Fear Silence & Tectonic join forces to present you with yet another very special event...2562's 'Unbalance' Album launch! Another coup for the We Fear Silence crew as 2562 mans the decks and fires his latest album bass shots at you straight out of the Funktion One sound system. Also doing his best to blow the bass bins will be Kode 9 joined by Tectonic boss Pinch, taking you on an extreme tour of the heaviest sub sections - Shed and Actress (Live) complete the Room One line up. Not enough for you? Well, here's the real kicker - Room Two's antics come courtesy of the irrepressible Planet Mu feat. Ikonika, Brackles, Subeena & Equinox. Will the wall that separates the two rooms still be intact come 5am? We've got the structural engineers putting up extra supports now...
