### MR.KILLEN

All species of garnets possess similar physical properties and crystal forms, but differ in chemical composition. MR.KILLEN is also known as Majorite, a type of garnet mineral found in the upper mantle of the Earth. His chemical formula is  $Mg_3(Fe,Al,Si)_2(SiO_4)_3$  and he's distinguished from other garnets in having Si in octahedral as well as tetrahedral coordination. His sounds were first described from Coorara Meteorite deep in some caves in Western Australia and been reported from various other meteorites in which were thought to result from an extraterrestrial high pressure shock event. His first deep and darkish "CAVE MAN" single separated from its ultramafic magmas on Malaita islands by DEEP GARNET RECORDS technicians while his second one entitled "TIME CHIME" contribute to keeping the Earth's surface moist and habitable. Nowadays you can catch MR.KILLEN surf in silvershine waters into Southwest Pacific, throwing darkish deep-breaks sounds to whales, dolphins and polite sharks!
