

NUBREAKS LOGOS FOR PRINT ETC.

Posted by admin - 2007/08/09 20:00

<http://nubreaks.com/NUBREAKSLOGOS.zip>

It is a 300 dpi CMYK psd file with 3 layers. Each layer is a variation of the logo to be used for flyers, banners, etc.

Here is a link to a vector version of the logo. It was done in Corel Draw so you may need to convert it unless you have Draw. :) The lettering looks slightly different due to the abnormal original font ratio but it is very close and will print on a large banner. I used the file to print out a 1.5ft x 6ft banner. Here is the link:

Nubreaks Logo Corel Draw

Are you guys open for some "different" tee designs within regulation of the logo (if any)? I'm a Designer by trade and wouldn't mind stabbing at one.

Here's my website fyi
