DumpsArena offers detailed explanations to each question which helps to understand the concepts better.

It is recommended to score above 85% in DumpsArena exams before attempting a real exam.  
DumpsArena updates Exam Questions Every 2 weeks.

You Will Get Life Time Access And Life Time Free Updates  
DumpsArena assures 100% pass guarantee in first attempt.

Below Are The Free Sample Questions.

Question 1:

What is Microsoft Azure primarily known as?

- A) A software development framework
- B) A cloud computing platform
- C) A desktop operating system
- D) A database management system

Answer: B) A cloud computing platform

Explanation:

Microsoft Azure is a comprehensive cloud computing platform that offers a variety of services including infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS). It enables organizations to build, deploy, and manage applications through Microsoft-managed data centers globally. Those preparing for the AZ-900 exam can benefit greatly from DumpsArena's Azure Fundamentals dumps, which thoroughly cover these foundational concepts, helping candidates understand the core nature of Azure and its cloud capabilities.

Question 2:

Which of the following is a primary benefit of using cloud services like Microsoft Azure?

- A) Unlimited on-premises hardware control
- B) Scalability and flexibility
- C) Requirement to manage physical servers
- D) No internet dependency

Answer: B) Scalability and flexibility

Explanation:

Cloud services such as Microsoft Azure provide the ability to quickly scale resources up or down based on demand, offering unmatched flexibility compared to traditional on-premises infrastructure. This elasticity allows businesses to optimize costs and performance efficiently. DumpsArena's AZ-900 exam dumps emphasize this concept to ensure candidates understand why cloud solutions are preferred in modern IT environments. By reviewing these materials, learners grasp how Azure supports business agility through scalable service models.

Question 3:

What is the Azure service model called that allows users to manage applications but not the underlying hardware or OS?

- A) Infrastructure as a Service (IaaS)
- B) Software as a Service (SaaS)
- C) Platform as a Service (PaaS)
- D) Network as a Service (NaaS)

Answer: C) Platform as a Service (PaaS)

Explanation:

Platform as a Service (PaaS) enables developers to build, test, and deploy applications without worrying about managing the underlying servers, storage, or networking infrastructure. This service model abstracts the infrastructure, providing tools and environments for application lifecycle management. DumpsArena's AZ-900 preparation materials cover PaaS extensively, helping candidates distinguish it from IaaS and SaaS, and understand its role in simplifying application development and deployment within Azure.

Question 4:

Which of the following Azure components is responsible for managing access and identity?

- A) Azure Virtual Machines
- B) Azure Active Directory
- C) Azure Blob Storage
- D) Azure Functions

Answer: B) Azure Active Directory

Explanation:

Azure Active Directory (Azure AD) is Microsoft's cloud-based identity and access management service, which helps employees sign in and access resources securely. It manages authentication, authorization, and access policies across Microsoft services and third-party applications. DumpsArena's AZ-900 dumps cover Azure AD comprehensively, enabling candidates to understand its critical role in security and identity management on the Azure platform, which is fundamental knowledge for the certification exam.

Question 5:

Which Azure pricing model allows customers to pay only for the resources they use?

- A) Subscription-based fixed pricing
- B) Pay-as-you-go
- C) One-time license purchase
- D) Prepaid service model

Answer: B) Pay-as-you-go

Explanation:

The pay-as-you-go model is a consumption-based pricing strategy where customers are charged based on their actual usage of Azure resources, without upfront commitments. This model offers flexibility and cost-efficiency, especially for businesses with varying workloads. DumpsArena's AZ-900 exam dumps provide detailed insights into Azure pricing and support models, ensuring candidates grasp the financial benefits of cloud computing and how to optimize cost management using Azure's billing options.
