If Blockaway isn't working as expected, it can be frustrating—especially when you're relying on it to access blocked sites or maintain block-away.com privacy online. Fortunately, many common issues with proxy tools like Blockaway can be resolved quickly. Here are some practical steps to get it back up and running:

### Refresh the Page or Restart the Browser

Sometimes a simple page refresh or restarting your browser can fix minor glitches. If a website doesn't load through Blockaway, try refreshing the page or closing and reopening your browser before troubleshooting further.
